

Fig 1. CmdLineParser Output

```
Command line arguments:  
Some("target\\debug\\examples\\test1.exe")  
"/p" "." "/p" "rs.txt" "/s" "/h"  
  
Help:  
Options: /P . /p "rs.txt" /s /r "abc" /H /h  
  
path      = "."  
abspath   = "C:/github/2inFawcett/RustCmdLine"  
paths     = ["rs", "txt"]  
opts      = {'H': "true", 'p': "rs.txt", 'P': ".", 's': "true"}  
  
That's all Folks!
```

# Codeathon Pre Event Design Challenge

Join a few friends designing a modest,  
but interesting application as a pre-  
Codeathon event

- Friday, November 13
- Specification handed out 24 hours before Codeathon begins
- Remote interactions using Zoom
- Q&A Session at Noon
- Design presentations via Zoom, 5:00 pm
